Future Plans

Life after NIU

After graduation, I plan to continue my education at a graduate level. I am interested in pursuing a Master's degree in Business Administration, with a focus on Management. I believe that this will provide me with the necessary skills and knowledge to advance in my career. I am also considering applying for a fellowship or scholarship to help fund my studies. I am excited about the opportunity to further my education and gain valuable experience in the field of business.

What I plan to accomplish in 5 years

In the next five years, I plan to complete my Master's degree and gain practical experience through internships and part-time work. I am also looking to build a strong professional network and develop my leadership skills. I am confident that by the end of this period, I will be well-prepared to take on a challenging role in a corporate setting.

Where I Hope to Live

I am hoping to live in a city that offers a high quality of life, with access to cultural and recreational activities. I am also looking for a community that is supportive and welcoming. I am considering cities like Chicago, New York, or San Francisco, as they offer a mix of professional opportunities and a vibrant lifestyle.
